

OEM BRAND REPLACEMENT GOOSENECKS

FOR USE WITH GENUINE AMERICAN WELDQUIP CONSUMABLES

GET THE **WELDQUIP** ADVANTAGE ON COMPETITIVE BRAND TORCHES

Whether you are looking at increasing consumables life on a competitive brand torch or to communize consumables during conversion of your plant to **AMERICAN WELDQUIP** torches you can enjoy the benefits of the **Weldquip** ADVANTAGE.

Our uniquely designed goosenecks and consumables act together to give you the performance and durability you require.

The **WELDQUIP** ADVANTAGE

CUSTOM FIT – **AMERICAN WELDQUIP** competitive goosenecks are designed for easy replacement of existing competitive gooseneck styles. Once changed out you will experience the durability and improved performance that you can expect from American Weldquip products.

“HEAT SINK” Gooseneck Technology – The rugged gooseneck design effectively dissipates heat by providing a continuous metal to metal path from the nozzle to the front of the handle. The entire length of the outer jacket functions as a radiator pulling the heat from the front end consumables. The unique designs of the gooseneck, nozzle, diffuser, and contact tip function as a team to keep the front end consumables running cooler to insure longer life.

THREAD-ON NOZZLE – The heavy walled, nickel plated nozzles thread directly on the gooseneck to provide cooler operation and a longer lasting nozzle system. The course thread, fixed position design feature insures a constant tip to nozzles relationship and consistent welding parameters.

CONTACT TIPS – Heavy-duty, course threaded contact tips are designed to provide extended life and insure a superior electrical connection to the tip holder/diffuser.

COMMON CONSUMABLES– Most **AMERICAN WELDQUIP** goosenecks are designed to utilize the same consumables to help reduce your inventory of consumable parts.

CUSTOM DESIGNS – **AMERICAN WELDQUIP** will be happy to custom-design a torch to fit your specific requirements. Custom-designed torches can normally be completed in a matter of days!
